WEDDING

The wedding was solemnized at the Manse, on Wednesday, of Frank J. Rubbelke and Etta May Cook, both of Caledonia. The ceremony was conducted by the Rev. N. W. Whitmore. The bride was accompanied by her parents, Mr. and Mrs. Albert Cook. We join in the general good wishes to the happy couple.

Mrs. Joseph Knapp, who underwent an operation for appendicitis, last week, is now making good progress.

Farm for Sale

All of 8, 14, 25.3-With Meridian, subject to lease for current year. By Public Auction at Empress, the 21st day of November, 1925, by David Lamb, Auctioneer.

This farm is about seventeen miles from Bonanza, 440 acres are under cultivation, of which 250 acres are breaking and fallow. There are one and a quarter miles of fencing. Two granaries 12x14, and a stable 50x32. The soil is a chocolate loam upon a clay subsoil. The property will be offered for sale at an open price of \$4000.00 at which sum bidding will start. TERMS: 10 p.c. cash; 15 p.c. within 60 days without interest; upon payment

Anglican Church

The Lord Bishop of Qu'Appelle, will administer the Sacrament of Confirmation, or the Laying on of Hands, in St. Mary's Church on Monday, November 2nd, at 7.30 p.m.

Confirmation, or the Laying on of Hands, is the means through which, ever since the time of the Apostles of our Lord, He has given the Gift of His Holy Spirit to His followers, thereby completing the gifts He has already given to them in Baptism. We read of Confirmation in the Bible in the 8th and 19th chapters of "The Acts of the Apostles," where it is clear that the Apostles performed this rite, because they had been told by their Master to do so. We are therefore obeying His orders by using it still. By the ancient rule of the Church, only those so admitted to its full membership have the privilege of receiving the Holy Communion.

Owing to the Confirmation at Cadz, on November 1st, there will be no service in St. Mary's Church on that Sunday. Sunday School at 2 p.m. as usual.

L. J. Tatham,
O. Norton

Mrs. J. G. Kelly, is entertaining her daughter from Edmonton.

Masquerade dance date, Nov. 6th.

Of which possession will be given, and the balance is 8 equal instalments in 15 and 18 months with interest at 6 p.c. per annum, or if the purchaser desires full payment will be accepted within 60 days without interest. In all other respects standing conditions of sale to apply.

Action No. 2476 Supreme Court, Calgary.

FURTHER particulars may be obtained from Mackel, Robertson, Smith and Co., Solicitors for the plaintiff, Calgary, Alberta, Refer to File No. 21810 W.O.R.

DATED at Calgary, the 22nd day of October, A.D. 1925.

"A. G. A. CLOWES," Clerk in Chambers.

APPROVED: "L. F. CLARRY," M.C.

Ladies of United Church

Successful Bazaar and Supper

The Bazaar and Supper which was held on Saturday, by the Ladies of the United Church, fulfilled their best expectations. Near the most hour a steady stream of patrons flowed into the building and all heartily of the wholesome fare provided. At the bazaar counter the ladies were successful in disposing of practically all the goods offered. Altogether the event was a most successful and gratifying one to the ladies, the proceeds as a result of the liberal public patronage, amounting to \$180.00. The ladies express their hearty thanks for support received.

Great Triumph for

Alberta Butter

The greatest triumph yet scored by Alberta Creamery butter in competition, was recorded the past week, when it was announced from London, England, that an exhibit of Alberta creamery butter, salted, made in the plant of the P. Burns Co., at Edmonton, had won first prize and gold medal, in the colonial section of the London dairy show, one of the largest shows of its kind in the world. This means that this exhibit from Alberta stood ahead of all other exhibits from other parts of the British Empire, not including Britain itself.

Two other exhibits from Alberta, made at the plant of the Woodland Dairy at Edmonton, and the Innisfail Creamery, were given high commendation in the show. The first prize in unsalted butter section went to also co-operative creameries of Regina, Sask.

In the colonial section of the show, Canada won four out of the six prizes offered for empiro wide competition, and Western Canada took three out of the six. This means that Western Canada Creamery butter is recognised in the most discriminatory market in the world, as the highest quality of butter produced in any of the British Dominions.

The exhibits from Alberta in the salted section were made under the auspices of the dairy branch of the Provincial Dept. of Agriculture, which gave substantial assistance to the exhibitors in enabling them to make the exhibit overseas. It is the first time that Alberta has exhibited in the London show, and it is regarded as a unique triumph for the Alberta dairy to dusty that the gold medal came to this province, even

FARM LAND FOR SALE BY TENDER

The West half and North-east quarter of Section 8, in Township 23, Range 2, West 4th Meridian, subject to the exception, reservation and conditions under which the said land was originally sold by the Hudson's Bay Company.

There are no improvements on this land, except fencing on North and West.

Tenders marked S. C. 24808 will be received for the above property by L. F. Clarry, Esquire, R.C. Master in Chambers, Court House, Calgary, Alberta, until 11 o'clock in the forenoon on Saturday, the 7th day of November A.D. 1925, and must be accompanied by marked cheque payable to the said L. F. Clarry, Esquire, for 15 p.c. of the amount of the tender, which will be returned if the tender be not accepted.

No tender necessarily accepted.

TERMS: 15 p.c. cash with tender and balance, without interest, within 60 days.

Conditions of sale and further particulars may be obtained from James McCaig at Calgary, Alberta, Solicitor for the Plaintiff.

DATED at Calgary this 7th day of October, A.D. 1925.

(Signed) A. G. A. CLOWES, Clerk in Chambers.

Approved: (Signed) L. F. CLARRY, M.C.

Home Nursing Class

The organization of the Home Nursing Class will not take place until after Christmas. Dates for this Class will be published early in January.

The list of names for Immunisation for Diphtheria, will be closed on November 4th. This order cannot be increased after that date, consequently it is up to you, if you desire to take advantage of this opportunity. Send your children's names to Mrs. H. H. Hall, at once.

bating out in competition the famous New Zealand dairy butter, which is made under almost perfect conditions.

Naturally, there is considerable elation among dairymen over the fact that Alberta butter has beaten the product from New Zealand. The grading systems in effect in the province have had considerable to do with the rapid improvement of quality of the butter manufactured in the plants in the province, and with this latest triumph Alberta butter is likely to be more in demand than ever in the British market, where last year a considerable quantity was sold.

Lucille Anderson, is confined to the house with a bad cold.

United Church

Sunday School, 8 p.m.
The late Marion Lawrence, one of the world's greatest Sunday School workers said: "Of course the boys and girls ought to go to Sunday School, but many of them are not there because parents, Church members, Superintendents are partly responsible." The superintendent of our United Church School is doing her share—we urge all parents and members to do theirs in the promotion of Religious Education in Empress.

7.30 p.m. Evening Worship. The Sabbath day is incomplete without attendance upon divine worship. Sundays are being planned to allow every household to honor their Church service and the religious education.

Topic: "The Mission of the Church." Sermon for boys and girls.

Music: Chorus and Duo, "Taking His Hand."

OTHER SERVICES

Beautyland, 8.30 p.m.

Weather and route permitting, services will also be held at—

Mayfield, 11 a.m., sharp. Social Plains, 2 p.m. N. W. Whitmore, Minister.

Leishman Clothes

Your Appearance Tells a Story

A man's appearance tells a story to the world at large. Correctly and smartly dressed he creates an impression of success. His clothes show taste and refinement. He stands out from the throng and commands respect.

Every wearer of Leishman garments has an air of distinction and good taste that no other clothing gives. The fine fabrics themselves bespeak quality! The faultless tailoring and fit are only what you would expect to find in the finest clothes in Canada.

Make sure your next suit is a Leishman. You'll be amazed at how much longer it will keep its fine shape and appearance than other fine clothes.

Shall Parliament Be Supreme?

The decision of a majority of the members of the Board of Railway Commissioners ordering the withdrawal from operation of the Crow's Nest Pass freight rates, raises one of the biggest domestic issues ever confronting the people of Canada. The question involved in this amazing order is not merely one of dollars and cents to the people based on the rates of freight they shall be called upon to pay. Important as this economic aspect of the question may be, it fades into insignificance compared with the legal and constitutional questions involved.

The issue now before the people in Canada is whether the Parliament of Canada is the supreme power in the making of laws, or whether a body of "some half-dozen men created by that Parliament has the right to nullify and sit at naught an Act of Parliament. By the decision of four members out of six, the Board of Railway Commissioners arrogate to themselves full power to treat an Act of Parliament as a "scrap of paper," and so doing impose on the people of Canada heavier taxation in the shape of railway freight rates than have the approval of Parliament.

And the Act of Parliament thus flouted is one ratifying and giving effect to a contract entered into by the Government of Canada acting for the people as a whole with the Canadian Pacific Railway. Therefore, another issue raised by the decision of the Board of Railway Commissioners is the sanctity of contracts. If the C.P.R. is not bound to fulfil its contract with the people of Canada as set forth in the Crow's Nest Pass Agreement, the question at once arises whether the people of Canada are bound to fulfil their part of the original C.P.R. contract providing exemption from taxation in perpetuity for C.P.R. property in their Western Provinces.

Furthermore, if the C.P.R. is not bound by its contract to maintain the lower freight rates provided for in the Crow's Nest Pass Agreement, how can the Canadian National Railway, as the successor of the old Canadian Northern, be bound by the rates provided for in the Agreement with the Parliament of Canada under which that railway was extended westward across the prairies?

Under the Crow's Nest Pass Agreement, which the Railway Board now seeks to annul, it was no way binding on the C.P.R. in the matter of freight rates as specified in that contract, the C.P.R. received from the people of Canada a cash bonus of \$1,000,000 per mile to assist in the construction of the Crow's Nest Pass railway. The C.P.R. accepted those millions of dollars and thereby obtained direct access to the rich mineral districts of Southern British Columbia and largely secured control of the traffic of that region which formerly had all gone over a short line into the United States. In exchange for this financial assistance the C.P.R. agreed to reduce freight rates on a selected list of articles below the then existing lowest freight tariff. Now the Railway Board nullifies that the C.P.R. is not bound to live up to its contract, and declares that the power of the Board to thus nullify the contract and impose higher freight rates on the people of Canada is superior to the power of Parliament itself.

Aside altogether from the financial considerations involved, the people of Canada will not for one moment accept the dictum that a Commission created by Parliament is superior to its creator. Under the British form of constitutional government, Parliament is supreme. Its decrees are to be interpreted and administered the laws passed by Parliament, but they cannot make laws nor override those passed by Parliament. And the Board of Railway Commissioners are constituted as a Court which hears evidence and renders decisions.

It is true that the Act creating the Board of Railway Commissioners invests and empowers that Board to remove any discriminations in rates or in traffic arrangements which may be made by the railway companies. But the tariffs fixed by the railway companies under the Crow's Nest Pass freight rates did constitute discrimination in various ways and between places. But in exercising its powers and discharging its duty in bringing about a removal of such discriminations, the Railway Commission is bound to act in accordance with the spirit and intent of the Acts of Parliament and specific contracts entered into by Parliament. There are other ways of removing the discriminations created by the railways than the method of nullification which the Board has chosen. The arguments of the lawyers employed by these railways, override an Act of Parliament, and increase rates.

By their decision the majority of members of the Board of Railway Commissioners have raised real issues in Canada and have started something which they cannot control. Certain it is, the people of Canada will never consent to their Parliament occupying an inferior position to any other body in the country, and least of all a body which Parliament itself created.

Breaks Grain Record

The Hutterite colony south of Baymont, Alberta, according to a report made by its leader recently, has established a unique record in grain production. In the five years they have been in Southern Alberta, the colony has produced more wheat than in all the years of its operations in North Dakota, extending over the decades. In the last five years the Hutterites in the Raymond district have produced 25,000 bushels of wheat.

The sound of a bell which came about 45,000 feet through the water here can be heard through the air only at high tides.

The "grain of Mustard" for health

Don't refuse the mustard when it is passed to you. Cultivate the habit of taking it with meat, especially at meat, it stimulates the digestion and aids in assimilating your food.

Crop Prices in 1922 and 1923

Prices Ruled Higher in 1923 Than in Previous Year

Statistical tables in the report of the director of the Dominion Experimental Farms for the year ending March 31, 1924, give comparisons for the years 1922 and 1923 of yields and prices of farm crops in Canada, and a comparison between the yields and prices in the eastern provinces, the prairie provinces, and British Columbia. These tables show an increase in the prices for the crops in 1923 compared with 1922, in the case of fall wheat, from \$1.01 to \$1.02 per bushel; flax seed from \$1.72 to \$1.77; corn for husking from 92 cents to 92 cents; potatoes from 90 cents to \$1.02 per hundredweight; and turnips, mangels, etc., from 54 cents to 59 cents, also per hundredweight. Buckwheat was stationary at 84 cents per bushel.

The total yield of the crops increased in the majority of instances in 1923 over 1922, the exceptions being: Rye, which decreased from 32,373,400 bushels to 22,231,500 bushels; peas from 2,170,100 bushels to 2,294,200 bushels; beans from 1,503,300 bushels to 1,041,700 bushels; corn for husking from 12,794,000 bushels to 12,689,000 bushels; potatoes from 55,745,300 hundredweight to 55,407,000 hundredweight; turnips, mangels, etc., from 5,375,500 hundredweight to 35,175,000 hundredweight; and fodder corn from 5,579,000 tons to 5,320,500 tons.

RHEUMATIC PEOPLE CAN NOW FIND RELIEF

By Driving the Rheumatic Acid From the System

Rheumatism is a disease which people who the blood is thin and watery, or charged with impurities, thus setting up a condition of the muscles and joints. Cold, wet weather or sharp winds, which cause the blood to contract and become thick, is rooted in the blood and to get relief must be brought out of the system. As a blood builder and nerve tonic, Dr. Williams' Pink Pills are unequalled in their ability to drive the rheumatic acid out of the system, and give relief to rheumatic sufferers who have proved the pills' ability to drive the rheumatic acid out of the system. Dr. Simon T. Tatton, Indian Head, Sask., who says: "For over two years I was in intense suffering from rheumatism and until I began the use of Dr. Williams' Pink Pills, I could not do a thing. I took them for a few weeks I could feel an improvement, and was able to get up. After on taking the pills until all traces of the rheumatism were gone, and I could again do my household work, feeling like a new person. Three years have passed since that and there has never been the slightest return of the trouble. I feel safe in saying that the relief brought by this medicine is permanent." You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Organize Bee Pools

Bee pools or co-operative societies for beekeeping have been organized in Ontario and Quebec, and are the status of the industry in Western Canada, that the coast and prairie provinces are expected to have similar organizations in operation before the end of the season. The next logical step, and the keystone of the enterprise, will in all probability be a central selling organization.

Women and Asthma

Women are numbered among the sufferers from asthma by the countless thousands. In every climate they will be found helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. D. Kellogg's Asthma Remedy has been a long help to thousands of women. Its medicinal, salt, entirely non-toxic collection, shows the immense benefit it has wrought among women everywhere.

Prairie Indians Prosperous

According to Indian Commissioner W. M. Graham, the Indians of the prairie provinces were never in such a prosperous condition as they are at the present time. There is a prospect of a splendid catch of fur-bearing animals this fall, he says.

No one need endure the agony of corns with Holloway's Corn Remover at hand to remove them.

Manager: "You've failed to be off this afternoon, to bury your aunt?" Clerk: "Yes, sir; if it doesn't rain."

Ice from century-old glaciers is used at an Alaskan cannery to keep fish fresh while being shipped to the markets.

Although vanity is supposed to be a feminine trait, one doesn't have to scratch very deep to find it in a man.

Manitoba Man Wins Scholarship

Selected For Scholarship Donated By W. C. Macdonald, Reg'd. Inc., Tobacco Manufacturers.

Montreal. R. M. White, a native of Darlington, Man., has been selected as Manitoba's nominee for a \$500 post-graduate scholarship in scientific agriculture, tenable at Macdonald College, Ste. Anne de Bellevue, Quebec, and leading to the degree of M.Sc. This is one of ten scholarships annually donated by W. C. Macdonald Reg'd. Inc., tobacco manufacturers of Montreal. Under the terms of the gift two of the scholarships are awarded to Quebec nominees, this by reason of the bilingual situation there. The remaining eight go one to each province.

In donating these scholarships, which have an aggregate value of \$5,000 each year, W. C. Macdonald Reg'd. Inc., is adhering to the policy of its founder, his Sir William Macdonald, who in his lifetime gave many millions of dollars for the advancement of scientific and technical education in the Dominion of Canada. Sir William Macdonald realized at a time when the fact was not apparent to others that progress in the Dominion would depend in a large measure upon the facilities offered for scientific and technical education. His vision in education in these lines has been realized in that it would be impossible properly to develop the country's natural resources or to advance its basic industry, agriculture. Accordingly he gave away millions. Part of his princely benefactions established and maintained Macdonald College, Ste. Anne de Bellevue, where these scholarships are tenable and which is one of the finest institutions of its kind in the Dominion. Part of them went to the establishment of a faculty of engineering at McGill University, part went to the Ontario Agricultural College at Guelph.

Mr. White, who represents Manitoba at this year's post-graduate course, took his high school diploma from the High School in '04, '05 and '06, and spent the following two winters in the Ontario Agricultural College. From 1909 until the outbreak of war he was engaged in various capacities in Manitoba, Saskatchewan and British Columbia, suffering in October, 1914, in the 27th Battalion. He was in France from September, 1915, until wounded at Cambrai in October, 1915. He returned home in March, 1919, and spent the following year on the farm near Darlington, later securing a position as field supervisor with the Soldier Settlement Board of Alberta. He spent nearly a year and a half at this work, and then registered for his B.S.A. at Manitoba Agricultural College. He became interested in entomology and obtained a position at Trebehu where he is now spending his third summer. He was a member of the team that represented Manitoba at the Royal Agricultural Show and won first and second prizes in the grand aggregate, and gold medals for swine and beef cattle. He obtained a medal in this judging contest.

Commemorating Women Doctor

Dr. Elsie Inglis Organized Scottish Women's Hospital During War

A somewhat belated memorial is to be established in London to commemorate that remarkable woman, the late Dr. Elsie Inglis, who organized the Scottish Women's Hospital during the war and raised one and a half millions for the purpose. The memorial is to consist of an endowment to maintain beds in the Obstetric Department of the Royal Free Hospital. Dr. Inglis always predicted that the war would cost her her life, and it did. This London School of Medicine for Women, with whose work Dr. Inglis was so closely connected, is celebrating its 50th anniversary on Oct. 14 and 15. A service at St. Paul's and a dinner in the Guildhall.

Kills Deer With Arrow

Miss Virginia Ayres, of San Francisco, killed an American deer with an arrow for the first time such a feat has been performed since the Indians forsook the bow. She sighted the deer near Cliverdale and killed it with a steel-headed arrow shot from a 35-pound bow—nearly double the strength of the ordinary woman's target weapon.

The Oil of Power—It is not claimed for Dr. F. H. Rowley's oil that it will remedy every ill, but its virtues are so various that it may be looked upon as a general pain killer. It is believed that greatness for itself and its intelligence is known to have tested its virtues and learned by experience.

It is stated that half the world's electric light is used in the United States.

New Comet Discovered

Said To Be Of Seventh Magnitude and Growing Brighter

A new comet, blazing across the sky two hours behind the sun, has been announced at the Harvard College Observatory.

It was discovered by the astronomer, Flinzer, of Bonn, Germany, on September 15, was observed a day later at Berlin, and second confirmation of it came from Liek Observatory in word that it had been observed there.

As comets go, the new comet is a big one, being of the seventh magnitude, just short of being within the unaided vision of the eye. The reports indicated that it was growing brighter.

The Advantage Of Compromise

Develop Ability to Examine Agreements With Eyes Open

Human nature is such that nations and individuals seek compromise of creative compromises only after periods of suffering. When people, the more successful politically, come to such agreements more often than do others. The British are famous for notorious compromises. England, on her own island, has not had a violent overturn in 25 years, but the British are usually the victors in their compromises. Some individuals are more capable of creative compromise than others, and these, usually, are the ones who make the real accomplishments. They develop a philosophy which enables them to examine—with eyes open—into every agreement that is presented.—Boston Globe.

Problems Of War Hates

Every Effort Should Be Put Forth to Dispel War Animities

Scientific circles in Britain are endeavoring to come to a decision on the question of admitting German delegates to next year's gathering of the British Association for the Advancement of Science. Doubtless this has been before the association for five years. At recent meetings of this body at Southampton the committee of recommendations decided by a narrow majority in favor of admitting Germans. The general committee decided, also, that, hitherto most of the delegates should be invited on a non-political basis, and the next move, it is reported, rests with the general council of the association, which meets in November.

Grounds put forth by opponents of the proposal to issue invitations to German delegates to confer with the association will be recognized, and doubtless appreciated, yet it would seem doubtful if any good purpose would be served by having men come from Germany from these meetings. It is not difficult to understand how hate, kindled by the war, has made it difficult to survive, nor is it forgotten how German science was brought to bear on the side of the Teutons against the British and other allied powers in the conflict. Yet should not every possible effort be put forth to dispel war animities that might have been kindled by the war, and is there not an actual danger to world peace by perpetuating these feelings of hostility. The present is a time for men of science to be developing their skill to the cause of peace, and it would seem that by international co-operation along this line, which is free of such contact as is proposed by the inviting of German scientists to the British convention, great projects of science would be helped along rather than hindered.

Germany in the past has had much to offer to the world in matters of science. Her exploration of the great field have been important and beneficial. A recent tabulation of the awards of Nobel prizes in physics, chemistry, and medicine for the past quarter of a century shows that Germany leads with 24 prizes winners, followed coming second by the United States, and England third with 11.

The Great War ended with the signing of the Treaty of Versailles, and while it may be difficult to banish entirely, in the few intervening years the hatreds unleashed by the conflict, if a war is to be made safe by the power of good will, it would seem wisest to neglect opportunities for the healing of old wounds and for the advancement of civilization such as offered in the present case—Regina Post.

The World's Largest Cities
London Still Maintains Her Place As The World's Greatest Metropolis
The question whether London or New York is the largest center of population in the world has been the subject of considerable difference of opinion. American authorities claim that the metropolitan area of New York has a population of eight millions, putting it some hundred thousand less than the British metropolis. But the Encyclopedia Britannica, in its latest edition, says that London in 1921 was still the largest city in the world, surpassing New York by at least one and a half millions.

It is clear that New York cannot have pulled out such a large margin as one and a half millions during the last four years. The London metropolitan district is probably larger than the New York metropolitan district, but Americans often refer to a metropolitan "area" that embraces population outside of the organized district. In this the latter is larger than the former. Chicago boasts that it has the fifth city in the world, which is growing rapidly in spite of its high percentage of foreign-born population. It is estimated that it has gained 100,000 in the last four years, leaving Paris behind.

"It is human to boast about this," the Toronto Star says, "but big cities also civilization at its worst as well as at its best. Living conditions decline as cities leave the million mark behind." The comparison of the growth of the people and their number are what really matters.

Out Interest Rate
Manitoba farmers will be able to obtain cheaper money from the Manitoba Farm Loans Association, the interest having been reduced one-half of one per cent. Premier Bracken announced. This makes the rate 6 1/2 per cent. The premier said the government desired further lowering of the rate, which will be possible if borrowers meet obligations promptly.

If you can't go on an excursion train, you can get the same effect by borrowing seven children and putting a candle in your eye.

W. N. P. 1928

Chief Cause Of World War

Viscount Grey Says Mutual Fear Was Principal Factor

"Mutual fear," in the opinion of Viscount Grey of Fallodon, was the chief cause of the world war. Viscount Grey, who as Sir Edward Grey, was foreign minister at the outbreak of the war, has published a book, "The World War," in which he has set forth the principal factors leading to the clash of 1914.

1. Germany had a reason for fear, anyone after the war of 1870, but she built up her armaments and formed the triple alliance, so that she might have reason to be afraid in future.

2. France, naturally, was afraid after 1870, and hence formed the dual alliance with Russia.

3. Great Britain, with a small army and a large empire, became first uncomfortable just then afraid of being isolated, particularly when Germany began building her big fleet. Hence Britain concluded the Anglo-Japanese alliance, joined up her quarrels with France and Russia, and joined the entente.

"Viscount Grey continues, 'Germany became afraid that she would presently be afraid, and she believed her power was at its height.' Viscount Grey doubts whether Europe even now is penetrated with the sense that war must be prevented in the future.

Still Active Although Over One Hundred

Independence Is Characteristic of Cheerful Little Irishwoman

Aged 102, Mrs. Mary Agnes Haddican, who lives in her home in Holloway, London, is the oldest woman in the world, and she is still independent. She is a cheerful, lively, and active woman, and she is still independent.

Mrs. Haddican is a grey-haired, cheerful little Irishwoman. She is still independent, and she is still independent. She is a cheerful, lively, and active woman, and she is still independent.

Independence, indeed, is her principal characteristic, for she still does all the housework in her small home. She is still independent, and she is still independent. She is a cheerful, lively, and active woman, and she is still independent.

Efficiency In Aviation

Europe Seems to Take Lead Over Other Countries

In the matter of efficiency in aviation Europe is far in advance of any other country. The British, French, and German air forces are the most efficient in the world. The British air force is the most efficient, and the French air force is the second most efficient.

The British air force is the most efficient, and the French air force is the second most efficient. The British air force is the most efficient, and the French air force is the second most efficient.

An Unnecessary Wait

The particularly well-looking man entered the doctor's counting room and took a chair.

"Well, what can I do for you?" asked the doctor.

"I don't think much of that cough medicine of yours," answered the man. "I'm sorry to hear that." The man replied, "What is the reason?"

"Why," said the other, "there's no much dead waste in it. I hadn't taken more than a quarter of a bottle when my cold disappeared, and there is the other three quarters just thrown away."

Million Motor Vehicles

Made In Canada

Industry Is Assuming Larger Proportion Than Ever

That over a million motor vehicles have been manufactured to date in Canada is one of many interesting facts relating to the automobile industry contained in a booklet "Facts and Figures of the Automobile Industry in Canada," recently published by the Automotive Industries of Canada, the trade association of manufacturers of motor vehicles, tires, parts and accessories.

Automobile manufacturing has been carried on in Canada continuously for just twenty-one years. Ten years ago the industry assumed large proportions and today it stands in the front rank of the Dominion's industrial enterprises.

More than a hundred thousand Canadians are now employed in relation to the industry and its products, and the industry is dependent on the manufacture and use of motor vehicles.

There are only two countries in the world—the United States and Great Britain—in which a greater number of motor vehicles are owned than in Canada, which in proportion to population—one car to every fourteen persons—the Dominion of Canada ranks next to the United States.

In value of Canadian products of all classes the automobile industry stands seventh. At the top naturally are the agricultural products, first being food and grain and milk products, then pulp and paper, third, meat products and so on. It is interesting to note, however, that while the motor vehicle stands seventh in total value of production, it stands fourth in value of exports, being surpassed only by grain and grain products, pulp and paper products and wood and wood products.

All of these three are especially related to Canada's natural resources, and the development of the motor vehicle industry is a testament to the fact that Canada is a country of great resources.

The first motor vehicle was made in Canada in 1907. Since that time the industry has grown rapidly, and it is now one of the most important industries in the Dominion. The industry is now worth over \$100,000,000, and it is expected to reach \$200,000,000 in the near future.

The First Notaries Public

Notaries public are said to have been appointed by the fathers of the early Christian Church to collect the tithes or offerings of the lives of the members of the first church. This office was afterwards changed to a legal employment, to attest deeds and writings, so as to establish their authenticity in any country. In the province of Quebec the notaries form a branch of the legal profession. Their acts are official.

Exempt Elevator From Taxation

Victoria's citizens by an overwhelming vote have decided to exempt the proposed multi-story passenger elevator at Ogden's Point from taxation, says the Victoria Colonist. The mayor of the city had appeared in the legislature to take this step in order to support a project which it is hoped will be the foundation of a great grain shipping business from the island port.

A man's goddam may be pardoned if it doesn't degenerate into vanity.

Super-Cattle For The North

Experiments in Breeding New Type From Buffalo and the Yak

Will the blazes that once overcame the prairie, monarchs that are now confined in their numbers, thousands by the fences of national preserves, be perpetuated by their contribution to a new strain of super-cattle? In Canada, a super-cattle for the Northern Canada.

That is a question that is often asked seriously when practical men discuss the experiments that have been carried out at Watulwip, where the Canadian Government keeps the largest buffalo herd in the world, now numbering more than 5,000 head.

Briefly, the intention of the experiments in cross-breeding has been to produce a hardy type of cattle, developing some of the characteristics of the buffalo, and with ability to "scratch" for themselves on winter pastures.

The idea was to toughen a breed that could be raised successfully and pastured in the northern regions of the Dominion. The results have been interesting; but, of course, it may be some years before any definite conclusion is reached.

Under A. G. Smith, superintendent of the park, Jim Wilson, who has been in charge of the cattle ranch, is the man who has carried out the practical end of the experiments.

The first cross-breeding trial was with a buffalo bull and a domestic bull. The result was called a cubito. This animal developed some of the characteristics of the domestic short-horn, but the buffalo predominated.

Then the yak, the buffalo of India, which is used there as a domestic animal, came on the scene and was introduced into this mixture of family blood. It was believed that the yak occupied the place of "missing link" between the buffalo and the domestic beef.

According to the officials in charge, the most promising cross-breed yet produced is the cubito (front of the cross between the domestic and the buffalo) when crossed with the yak. This cubito gives promise of approaching what the experimenters first hoped for. Then there is the cross-breed between the yak and the domestic animal. The calf of this union grew at a tremendous pace, and within twelve months was as big as its mother.

In addition to buffaloes, there are elk, moose and deer on the big Watulwip Reserve. It is also a big sanctuary.

The Signal Of Peace

Why does the dog wag his tail? A scientist answers that it is the wag of peace, which has been handed down from the days when most dogs were enemies of each other. The term, "white flag," comes from this habit of the dog, he says, and explains that if there are any white spots on a dog, one of them is most sure to be found on the tip of the dog's tail.

Creation Of World

An English geologist, addressing the British Association, said that the crust of the earth is between one and two billions of years old. That Archbishop Fisher said the date of the creation of the world was 4,000 B.C. The geologist said that the theologian's knowledge was more exact than that of the scientist—Hamilton Herald.

Distance That Is Hard To Realize

Mind Cannot Grasp Remoteness of Some Stars Known to Astronomers

If a telegraphic message could be sent to the stars, it would reach its destination in a little more than a second. It would take something like eight minutes to arrive at the sun, but how long, do you think, would it take to reach the star called Alpha Centauri, travelling thirty 180,000 miles a second? Seconds, minutes, hours, days, weeks, months, would not be long enough; it would take no less than three years, travelling all the time at that tremendous pace, before it would reach its destination. If this is the case with respect to the nearest of stars, what must be said of those further off?

There are stars so remote that it is the news of the victory of Wellington at Waterloo had been faded to them in 1815 on the electrical telegraph wire, it would not have reached them yet, even if the message had sped at the rate of 180,000 miles a second, and it would be travelling all the time; that, when William the Conqueror landed in England in 1066, the news of his conquest had been dispatched to them, and if the signal had ever the wire at a pace which would carry it seven years, the news would not have reached them, the news would not have reached them, the news would not have reached them.

Even if the glad tidings of that first Christmas in Bethlehem, almost two centuries ago, had thus been disseminated through the universe, there are yet stars of which astronomers could tell us nothing, and which are so far away that the light from them would not reach them, though it travelled 180,000 miles every second!

Tourists Anxious To See Prince's Footmark

Made Years Ago In Fresh Concrete At Castle In Scotland

Tourists are flocking to the Abercrombie Castle in Scotland, the official Highland home of the Prince of Wales, though he has never spent much time there. They want to see the "Prince's footmark," until the past year, a secret known only to the Prince, an elderly woman and a former London policeman.

The incident happened when the Prince, at the age of seven, was staying with his father and mother at Abercrombie. Workmen had been laying a concrete pavement across the castle. One morning the Prince, dressed under the barrier and before the housekeeper and policeman who were with him, could call a workman to him, and he said, "I want to see the Prince's footmark." The workman, who still retains the impression.

The episode was kept a secret until last year, when the former policeman told some visitors of it. He later apparently spread the story, hence the rush of curiosity seekers.

A Pot Reply

In a Western church, the minister announced his text, "Paul we know and Apollon we know, but who are they?" Just then the verger was showing two strangers into a pew, so in an undertone he said, "Two commoners, travellers from Wilt's Hotel, your reverence."—Western Christian Advocate.

Lumber Industry Loses

Drastic measures will be attempted in an effort to curb the heavy losses caused to the lumbering industry of Ontario through fire, according to Hon. Dr. Forbes Godfrey, minister of health, who places the yearly cost at about \$10,000,000. Last year 28,000 men were employed in the industry, he stated, and at this number 4724 were killed. The cost of the lumbering industry is not only a loss to the industry, but a loss to the country, as the lumbering industry is a source of revenue to the government.

Creations Production

The production of creases in Canada in 1921 totalled 121,675,880 pounds valued at \$2,515,875 according to the Dominion Bureau of statistics. Compared with the preceding year an increase of 49,504 pounds is shown in the quantity, but a decrease of four million dollars in the value. The average price per pound was 16 cents in 1921 and 19 cents in 1922.

Fighting Fire Planes

Notes for aeroplanes in the latest form of the anti-airplane defense. Tested between parachute jumps, the plane shot upward in flames. When the bombs burst high in the air, the parachute opened, spreading the nets in the path of the enemy planes.

Many a good detective makes light of his ability as a shadow.

Trafalgar Square, Closed For First Time In Twenty Years

To improve the appearance of this famous rendezvous at Charing Cross, the contractors have boarded up the sides of the Square preparatory to repaving with a new floor of sandstone. The above photograph, which was taken from a window in the European offices of the Canadian Pacific Railway, shows the boarding around the Square and the use to which it is being put by the enterprising officials of Wembley.

Cuticura Heals Itching Eczema On Arms and Face

"My trouble began with red blotches and itching and burning on my arms and face, and then spread all over my body except my hands. I was diagnosed as having eczema and told that my clothing aggravated the breaking out on my arms. I could not put my hands in water, neither could I wash my face. At night I had no sleep because of the irritation.

"After several weeks passed about a month, I began using Cuticura Soap and Ointment and they helped me start getting rid of it. After two boxes of Cuticura Soap and two boxes of Cuticura Ointment I was completely healed." —Bessie M. Leo, Lincoln, N. D., 406 Atkins St., Ellsworth Park V.

Use Cuticura Soap, Ointment and Talcum for all toilet purposes.

Get Cuticura at: Druggists, Grocers, Sundry Stores, Department Stores, etc.

THE EMPRESS EXPRESS

Thursday, Oct. 29, 1925

Today is polling day.

Halloween Saturday.

Macquerie dinner, Friday, November 6.

Miss L. Glover was the guest of Miss Fykes teacher of Trosley School, over the week end.

Mrs. H. R. Simpson, underwent a major medical operation at the Holy Cross Hospital, on Saturday.

The I.O.B.E. will meet Tuesday afternoon, November 3, at 3.30 o'clock, at the home of Mrs. J. McLean.

J. Kirner, was a business visitor to Sceptre, Sask., Monday.

Stormy weather over the early part of the week, again puts a step to threshing activities.

Miss Lizzie Montgomery was admitted to the hospital on October 20.

Florence Pawlak, was admitted to the hospital on October 20.

Beatrice Roberts was discharged from the hospital on Monday.

Mrs. G. M. Miller, and children, were the visitors of the former's parents, Mr. and Mrs. Perigo, sr., at Swift Current, last week.

Alex. Chow, of Sceptre, Sask., was in town, this week.

Miss Betty Lawson, went to Estuary, on Monday last, where she is engaged on professional duties.

R.M. Mantario (out from last week)
